

# Business Process Management

► Brussels 8th June 2006

Didier Pujol  
Founder of DPM Services

*"Business Process Management allow the design, analysis, optimisation and automation of any kind of business processes.*

*The specific control of relevant corporate processes -not only software applications- has proved to be a key success factor for companies whose strategy is to anticipate and integrate.*

*Both internal and external integration of processes is becoming the business differentiator in Finance, Service and Manufacturing sectors.*

*This is the reason why DPM services has decided to Set up this technology and business event about Business Process Management in Brussels, Paris, Lyon, Zurich.*
